EXPLANATORY NOTES

Introduction

This publication contains summary tables of final data for characteristics of persons and dwellings enumerated in Victoria at the 1981 Census of Population and Housing. The twelve tables presented have been selected to give a broad picture of the personal, dwelling and labour force characteristics of the areas.

The information is contained in two parts: the first part contains statistics for Victoria and for local government areas in the Melbourne Statistical Division, as well as totals for Statistical Divisions and Statistical Districts; the second part contains statistics for local government areas in the balance of the State. In addition totals are given in both parts for the complete local government area in those cases where it is not wholly contained within one Statistical Division, and in part two in those cases where the local government area is not wholly contained within a Statistical District.

For the purpose of the 1981 Census, LGA boundaries in Victoria are those as defined at 1 January 1981.

Scope and Coverage

- The 1981 Census of Population and Housing aimed at counting every person who spent Census night, 30 June 1981, in Australia Including persons on vessels in or between Australian ports, on board long-distance trains, buses or aircraft. All occupied dwellings and unoccupied private dwellings were counted. People were counted where they were on Census night, which may not be where they usually live. Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to stay. Australian residents out of the country on Census night were excluded from the count.
- 3. Diplomatic personnel and their families are, by definition, out of the scope of the Census, as are diplomatic residences.
- 4. While every effort is made to minimise under-counting in the Census, some inevitably remains for various reasons (eg inadvertent omission of very young children, treatment of some dwellings as unoccupied when, in fact, they were occupied, and failure to find all dwellings). Refusal by householders to complete the Census Schedule is not a significant cause of under-counting.

Difference Between Census Counts and Population Estimates

5. Census counts from the 1981 Census of Population and Housing are different from the official estimates of the population.

Results of the Census are in terms of census counts, meaning a count of all persons who filled in a census schedule where they were on Census night. If a person was at a place other than his or her place of usual residence on Census night, then that location is where that person was enumerated.

However, official population estimates for Australia, States and Local Government Areas are in terms of estimated resident population. For each State this is calculated as follows:

Population Census counts for each State

- + residents who were away interstate on Census night
- people who were visiting each State from another part of Australia
- people visiting each State from overseas

This calculation gives a figure called "census ∞ unts, place of usual residence".

This figure is then adjusted for under-enumeration. An under-enumeration estimate for each State was obtained from the results of the post-enumeration survey conducted shortly after the Census - a survey aimed specifically at ascertaining how many people were missed at the Census.

Finally, those residents who were temporarily overseas are added. Thus, census counts, place of usual residence

- + adjustment for under-enumeration
- + residents temporarily overseas
- = estimated resident population

For Australia and each State estimated resident population is updated each quarter on the basis of estimates of births, deaths and net long term and permanent migration. Estimates of the resident population of Local Government Areas are updated each year.

Further information on population estimates is available from an ABS information Paper "Population Estimates: An Outline of the New Conceptual Basis of ABS Population Estimates" (Catalogue No. 3216.0) Issued on 29 March 1982.

Definitions

- 6. <u>Dwellings</u> For Census purposes, dwellings are classified into two groups: occupied and unoccupied. Occupied dwellings can be either private or non-private while unoccupied are private only.
 - a. An occupied private dwelling is defined as the premises occupied by a household on Census night (for definition of Household see below). A private dwelling is normally a house, flat, part of a house or even a room but it can also, under certain conditions, be a tent, houseboat or caravan. It is Important to remember that the Census definition of a private dwelling means that the total number of dwellings may be more than the total number of known structures in any given area (see Household below). Non-private dwellings are hotels, motels, boarding houses, gaols, religious and charitable institutions, defence establishments, other communal dwellings and caravan parks.
 - An unoccupied dwelling is a structure built specifically for living purposes and capable of being lived in but unoccupied at the time of the Census. Vacant houses, holiday houses, huts, cabins (other than seasonal workers! quarters) and houseboats are counted as unoccupied dwellings but vacant tents, garages and caravans (If not normally occupied) are not. Also included are newly completed dwellings not yet occupied; dwellings which are vacant because they are due for demolition or dwellings to let; and repair; dwellings where all members of the household were absent on Census night.
- 7. Household - For Census purposes, a household is either a person living alone or a group of people living together as a single domestic unit with common eating arrangements. It is possible for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his own food is not a member of the family's household but constitutes a separate household and therefore completes a separate householder's schedule. Because an occupied private dwelling is defined as the premises occupied by a household on Census night (see above), the number of households and the number of occupied private dwellings is identical and the number of occupied dwellings, as defined for Census

purposes, may be greater than the known number of structures.

- 8. <u>Migratory</u> Persons enumerated on board vessels in and between Australian ports, or on board long-distance trains, buses or aircraft are classified as Migratory. Such persons are not included in the population of specific LGA's but are shown as a balancing item in the population of the State.
- 9. <u>Labour Force</u> For the 1981 Census, the labour force was defined as:
 - a. those persons who worked during the week prior to Census night;
 - b. those who had a job from which they were temporarily absent;
 - c. those who were temporarily laid off without pay for the whole of the reference week; and
 - d. those who did not work or did not have a job but were actively looking for work.

Persons helping but not receiving wages or salary and who worked less than 15 hours in the week prior to Census night were excluded from the labour force.

10. Occupation - An occupation is defined as a collection of jobs sufficiently similar in their main tasks to be grouped under a common title for classification purposes. The occupations range over 389 possible codes which are further grouped into 73 minor groups and 11 major groups. Only employed persons are classified to an occupation.

Random Adjustment of Small Cells

- The ABS has a policy of protecting the confidentiality of information which it receives from individuals and businesses. The number of census characteristics tabulated and the detail requested in census releases inevitably produces tables in which there are many cells with very small numbers. These may inadvertently allow the release of identifiable information, even though identifiers (such as names and addresses) are not available. It has been necessary, therefore, for the ABS to randomly adjust small non-zero cells in the more detailed tabulations. These adjustments allow the maximum amount of detailed census data to be published.
- 12. The random adjustments are insignificant in relative terms except for numbers too small, in any case, to be of statistical significance. In addition, small

numbers in the original data may be affected by such things as respondents omitting to answer particular questions or giving incorrect answers, or by the occasional error in coding or transcribing data in the course of ABS processing. No significance should be attached to cells with values of 3 or less.

13. The column and row totals, sub-totals and overall totals have been derived after the random adjustment process has been applied. Further information is contained in information paper - Census 81 - Effects of Introduced Random Error, 2156.0.

Geographic definitions

- 14. <u>Local Government Areas</u>. At 30 June 1981 Victoria was divided into 211 municipal districts and the Yallourn Works Area.
- Statistical Division Statistical Divisions are designed to be relatively homogeneous regions characterised identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. Capital City Statistical Division 15 predominantly urban in character and the boundary is delineated to contain the anticipated urban development of the Capital City (and associated Urban Centres) for a period of at least twenty years.
- 16. Victoria has been divided into 12 statistical Divisions since 1974. This involves the spiitting of several local government areas. The Shires of Cranbourne, Healesville and Pakenham are partly in the Melbourne Statistical Division and partly in the East Central Statistical Division. Up until 30 June 1981 the Shire of Rosedale was partly in the Central Gippsland Statistical Division and partly in the East Gippsland Statistical Division. From July 1981 it has been wholely allocated to the Central Gippsland Statistical Division.

The Statistical Divisions in this publication correspond with the regions adopted by the Victorian Government in October 1981 except in the cases of the Metropolitan, and Central Gippsiand Regions and, because of crisequential effects, the Central Highlands, Liddon-Campaspe and East Gippsiand Regions. The Victorian Government's Metropolitan Region comprises the Melbourne and East Central Statistical Divisions and the Shires of Bacchus Marsh and Gisborne and the East Gippsiand Region Including all of the Shire of Rosedale.

17. Statistical District - Statistical Districts generally contain an Urban Centre with a population of 25,000 or more. Their boundaries, like those of Capital City Statistical Divisions, are delineated to contain the anticipated urban development of the centre for a period of at least twenty years. These fixed boundaries delineate areas which for general statistical purposes are free from the problems imposed by the moving boundaries of the majority of Urban Centres.

Other Information

- 18. This publication only includes summary tables for local government areas, statistical districts, and statistical divisions in Victoria. However, information for a greater range of summary tables and at other geographical levels is also available for Victoria and for other States.
- 19. An Information paper: Census 81 Data Release Plans (2142.0), with an Addendum, describes the plans for release of data, information papers and maps from the 1981 Census and is available on application.
- 20. If you would like further information about the statistics available from the 1981 Census, please contact your local ABS Office (in Victoria Information Services, Cnr Flinders and Elizabeth Streets, Melbourne (Box 2796Y GPO Melbourne 3001); Telephone 630181).

Abbreviations Used in this Publication

Aborig TSI - Aboriginals and Torres Strait Islanders.

Aust Citzs - Australian Citizens.

Dwg attached Non-dwg - Dwelling attached to a non-residential dwelling (eg shop, office, factory).

Germany (GDR+GFR) - German Democratic Republic and German Federal Republic.

NEI - Not elsewhere included.

N/S - Not stated.

Occupied pte dwellings - Occupied private dwellings.

Tenant - Hse Authy - Tenant of a Government Housing Authority (eg Housing Commission of Victoria).

E. BOURKE
Deputy Commonwealth Statistician
